Summary

Final-year CS student with hands-on experience building full-stack web applications using the MERN stack. GATE CSE 2026 qualified and hackathon finalist. Familiar with DSA and core CS concepts, passionate about building complete, production-ready products.

Education

Islamic University of Science and Technology (IUST)

Bachelor of Technology in Computer Science — CGPA: 7.5 / 10

Srinagar, Kashmir

Aug 2022 – Aug 2026

Technical Skills

Languages:	C, Java, JavaScript
Web / Frameworks:	React.js, Node.js, Express.js, REST APIs, EJS, HTML, CSS, Tailwind CSS
Databases:	MongoDB, MySQL
Tools:	Git, GitHub, Postman, VS Code, JWT
Core Concepts:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Problem Solving

Projects

FinForge

[Live Demo](#) | [GitHub](#) | April 2026

React, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Recharts

- Architected a full-stack financial platform enabling users to track 3 core financial categories - income, expenses, and transaction history - through a clean, intuitive interface.
- Implemented JWT-based authentication with protected API routes, ensuring secure access to all financial data.
- Built interactive dashboards using Recharts to visualize spending patterns and financial trends over time.
- Implemented transaction filtering, sorting, dark mode toggle, and multi-currency support to enhance usability.
- Designed and consumed RESTful APIs following industry-standard practices for data handling and error management.

Local Services Aggregator Platform

[GitHub](#) | July 2025

React.js, React Router, Tailwind CSS | Hackathon Project

- Designed and built a responsive service listing and booking platform end-to-end within a 24-hour hackathon.
- Implemented 2 role-based dashboards for users and service providers with distinct workflows and access controls.
- Engineered dynamic client-side routing using React Router for seamless, multi-view navigation.
- Improved user experience by designing intuitive navigation and reducing user steps in the booking flow.

Wanderlust

[GitHub](#) | April 2025

Node.js, Express.js, MongoDB, EJS, HTML, CSS, JavaScript

- Built a full-stack property rental platform where users can browse listings, manage properties, and book stays.
- Developed a RESTful backend with Node.js and Express.js; used MongoDB for persistent data storage.
- Implemented session-based user authentication and authorization for secure account and listing management.
- Rendered a dynamic, data-driven frontend using EJS templating with a responsive layout and clean UI.

Certifications

Delta — Full Stack Web Development | Apna College | 2025

Achievements

- Qualified **GATE CSE 2026** — a national-level Computer Science & Engineering exam conducted by IITs.
- Hackathon finalist — cleared 4 evaluation rounds and reached the final one-on-one technical round (2025).
